Front-End Web Developer

We are looking for a front-end web developer to help build beautiful, usable interfaces for our users and who is motivated to combine the art of design with the art of programming. From student to customer experience, ZUGVOGL aims to provide great interfaces for understanding and fulfilling users' needs.

What you love to do:

- Develop new user-facing features
- Ensure the technical feasibility of UI/UX designs for all our different user bases
- Optimize application for maximum speed and scalability
- Implement design of high-quality, high-touch experience through products like live chat, dynamic and contextual contact forms, and measure our success through quick customer satisfaction surveys.

What we look for in you:

- Can empathize with the many different types of users who use ZUGVOGL's UIs
- Excellent understanding of CSS, HTML, Java Script
- Enjoy building UIs with modern libraries like jQuery, React
- Can think through customer requirements to come up with high-impact ways of quickly solving their problems
- Care deeply about performance and accessibility
- Have a high bar for quality of code and quality of user experience

If this sounds interesting to you, send us an email with your LinkedIn/Github profile(s) and a few sentences about yourself to jobs@zugvogl.com. We look forward to hearing from you!
